

IM816

GRANULAR CARBON

IM816's granular carbon by steam activation of select wood based Its can absorption odor color and some molecular organic compounds. It is also ideally suited for the absorption chlorine from water.

Product	Wood Based Granular Carbon
Size (mesh)	8x16 (1.18-2.36 mm)
Application	Water purification : Deodorization, De-colorization, De-chlorination and Organic compound in water
Physical properties	Specification
Iodine Number (mg./g)	Min. 300 - 550
Surface Area (m ² /g)	Min. 350 - 600
pH	9 -11
Ash (%w/w)	Max. 5
Hardness Number (%)	Max. 95
Moisture (%w/w)	Max. 8
Apparent Density (g/cc)	Min. 0.50

Standard Packaging :

20 kg /bag (44 liter) , 350 kg/ big bag (770 liter)
